

Using Gas Cylinders Safely

This online workshop is for individuals who use gas cylinders and equipment in a wide range of applications. Typically, this may be in a laboratory or research environment however, the training is designed to meet the needs of most cylinder gas users. The training contains information on:

- Oxidizers / oxidants and inert gases
- Fuel gases
- Gas cylinders and valves
- Using gas cylinders safely
- Gas regulators
- Safe handling of gas cylinders
- Safe storage of gas cylinders
- The correct set-up of a gas cylinder system

At the end of this online training workshop learners will be able to:

- Correctly identify gas cylinders
- Understand how cylinders operate
- Be aware of the hazards of asphyxia
- Recognize the hazards posed by oxygen enrichment
- Identify flammability hazards
- Select the correct gas control equipment
- Identify the key stages in using cylinders safely
- Recognize the hazards associated with handling cylinders
- Reassess current storage facilities in line with safe working practices
- Become proactive in assessing risk when using gas cylinders
- Introduce safe working practices into their working environment

The fee for this workshop is US\$70.00 per learner including online certification and comprehensive, readily accessible support documentation. We offer discounts for purchases of more than 10 workshops, please contact us for further information.

You can purchase this e-learning workshop using a credit or debit card on our website. If you do not wish to purchase by card and prefer to be invoiced instead please contact us to discuss your requirements by e-mail at admin@gassafetytraining.com.
